Aspiring Computer Scientist and Entrepreneur with 4+ years of experience in full stack open source web development, systems, and creative design skills. Enjoy exploring the latest cutting-edge technologies to develop innovative solutions for education and social good.

EDUCATION

UNIVERSITY OF CALIFORNIA, BERKELEY

B.A. Computer Science, B.A. Economics

Expected Graduation: May 2022

Honors: Regents' & Chancellor's Scholarship Candidate

Relevant Coursework: Structure & Interpretation of Computer Programs, Data Structures, Designing Information Devices & Systems I & II, Multivariable Calculus

Berkeley, CA

August 2018 – Present

EXPERIENCE

BERKELEY RISE LAB,

Research Assistant at BETS Research Group

Berkeley, CA

January 2019 – Present

- Enhancing energy efficiency and sustainability of commercial buildings by developing an Extensible Building Operating System (XBOS) for smart integration between building control systems
- Refined and restructured gRPC microservices for collecting building metadata and generating predictions
- Devised and implemented a custom, comprehensive Python testing suite that revealed critical bugs in the microservices, cutting debugging time by 30+ hours

UC BERKELEY DECAL BOARD

Web Development Intern

Berkeley, CA

January 2019 - Present

- Launching UC Berkeley DeCal Program's premiere portal for students to find, create, and facilitate courses
- Offering a variety of services like sorting and filtering through 100+ classes, submitting online course proposals, approving courses, real-time tracking student course registration, etc.
- Constructing web portal using MongoDB, Node.js, Express, GraphQL, React, Redux, Prisma, Docker, and AWS

EDCAST INC

Software Engineering Intern

Mountain View, CA

June 2017 – August 2017

- Boosted real-time team collaboration by integrating a brand-new live video calling feature using React & Redux
- Maximized team productivity by generating detailed bug reports, assigning bugs, and resolving 30+ cases
- Delivered thorough qualitative analysis reports by building cross-browser automated testing suites using Protractor, Mocha/Chai, Jenkins, ReactUtil & Selenium
- Consolidated and developed Postman automated test suites for REST API with various business scenarios

EASY LOOP

Product Originator

Cupertino, CA

January 2016 – Present

- Pioneered an open-source Chrome Extension serving 15,000+ high school students across the country
- Streamlined the grade calculation process, increasing student productivity and saving students 5 hours of otherwise lost time every week
- Designed a product site, started a Facebook page with 300+ followers, and earned school press coverage

App Link: <http://tinyurl.com/easyloop>

SKILLS

Proficient: Java, Python, JavaScript, Node.js, Express, React, Redux, GraphQL, MongoDB, SQL, HTML5, CSS3, REST API Development, gRPC, Docker, React Native

Familiar: AWS, Neo4j, Swift, OpenCV, Sci-Kit Learn, Tensorflow.js, Blockchain

ACCOMPLISHMENTS

- Top 15% Internationally at Association of Computational & Mathematical Modeling, Gamma Prize Winner
- Top 5 Teams at MakeHacks & Los Altos Hacks, Dailymotion Best Social Media Hack
- Raised \$2000 for the Sankara Eye Foundation through organizing Java and JavaScript bootcamps
- Spearheaded Cupertino's largest student-led hackathon, TinoHacks, twice by raising \$20000 and acquiring 350 participants, 25 sponsors, and 14 mentors
